

PRINEL PILLAY

Web Developer & Software Engineer | Digital Systems & Automation

+27 60 753 5564 • prinelope18@gmail.com • Johannesburg, South Africa

Portfolio: prinelope.github.io • GitHub: github.com/Prinelope

PROFESSIONAL PROFILE

I’m a Web Developer & Software Engineer with hands-on experience across websites, WordPress, CRM, automation and digital systems. In my current role at Connections in Mind, I build and improve solutions across web platforms, learning systems and operational workflows.

I work with HTML, CSS, JavaScript, PHP, APIs, webhooks and Git. I enjoy figuring out how systems fit together, where people get stuck, and how technology can make the process clearer and easier to use.

TECHNICAL SKILLS

Programming & Web

HTML • CSS • JavaScript • PHP

Development Tools

Git • GitHub • Visual Studio Code

Web Platforms

WordPress • WooCommerce • LearnDash • MemberPress

Integration & Automation

APIs • Webhooks • Zapier • System integrations

Business Systems

Odoo • Insightly CRM • Microsoft 365 • SharePoint

Additional Strengths

Responsive development • UX • Accessibility • Debugging • Data analysis • Google Analytics • Marketing technology • Cybersecurity fundamentals

TECHNICAL PROJECTS

Executive Function Assessment Platform

HTML • CSS • JavaScript • WordPress • Webhooks • Automation

- Developed interactive multi-step assessment functionality with scoring logic and personalised user outputs.
- Built responsive front-end interactions and connected submission workflows using webhooks and automation.
- Designed the experience around usability requirements and diagnosed issues across connected platforms.

Resource Discovery & Member Experience

WordPress • WooCommerce • LearnDash • MemberPress • PHP • JavaScript

- Managed and developed the Connections in Mind BrainHub e-commerce and member portal across WordPress, WooCommerce, LearnDash and MemberPress.
- Supported customer journeys from purchase and access through to learning content and resource discovery, including separate public and member experiences.
- Used HTML, CSS, JavaScript and PHP to customise WordPress behaviour and troubleshoot access, membership and platform issues.

CRM & Workflow Automation

APIs • Webhooks • Zapier • Odoo • Insightly CRM

- Built and configured CRM workflows connecting client records, opportunities and project delivery.
- Designed integrations and automations across Odoo, WordPress, forms and business systems to reduce repeated admin.

PROFESSIONAL EXPERIENCE

IT & Digital Support Coordinator

Connections in Mind | Oct 2021 – Present

Develop, integrate and maintain digital platforms across web, CRM, learning and marketing systems, combining web development, systems integration, automation and user-focused problem-solving.

- Develop and maintain responsive WordPress functionality using HTML, CSS, JavaScript and PHP.
- Build and maintain integrations between websites, CRM systems, forms, learning platforms and communication tools using APIs and webhooks.
- Design automated workflows that reduce manual administration and improve data consistency across business systems.
- Troubleshoot and resolve application, integration and website issues across production platforms.
- Manage the Connections in Mind BrainHub e-commerce and member portal, including WordPress, WooCommerce, LearnDash and MemberPress functionality, user access, purchases and learning journeys.
- Translate business and user requirements into practical technical solutions and platform improvements.
- Produce clear technical documentation and collaborate with cross-functional stakeholders.
- Analyse website and user data using Google Analytics, and support digital marketing across website content, email campaigns and connected CRM workflows.

EARLIER EXPERIENCE

Video Editor

Rosettenville Baptist Church | May 2021 – Oct 2022

Edited and produced video content for online and social media platforms, working with stakeholders to meet communication objectives.

Student Intern – Information Technology

Damelin College | Feb 2019 – Jan 2020

Assisted with programming and IT support activities, gaining practical exposure to software development fundamentals and technical troubleshooting.

EDUCATION & CERTIFICATIONS

Diploma in Information Technology with Merit Award

Damelin College | 2018 – 2020

Certifications

- Introduction to Cybersecurity – Cisco
- Responsive Web Design
- Modern AI (in progress)
- Using Canva for Graphic Design

WHAT I BRING

- Real-world experience building, supporting and improving live digital platforms used by internal teams and external users.
- A practical, people-focused approach to development, systems and UX.
- Comfortable translating non-technical requirements into working solutions and explaining technical concepts clearly.
- Curious, teachable and actively growing into broader software engineering responsibilities.
